TRAINING / SEMINARS / CERTIFICATIONS

[Add only actual training, seminars, or certifications, if any.]

WORK EXPERIENCE

None yet — student applicant.

COVER LETTER

September 24, 2026

Hiring Manager

Systemantech

Clark Freeport Zone, Pampanga

Dear Hiring Manager:

I am applying for the **IT Staff (Open for Fresh Graduates)** position. I am a Bachelor of Science in Information Technology student at PHINMA Araullo University – South, and I am interested in developing practical skills in IT support.

The opportunity interests me because the role involves technical support for computers and peripherals, software and operating-system troubleshooting, diagnosing hardware and software problems, and assisting users. These responsibilities are related to the computing and IT skills I am developing through my coursework.

My academic work has included programming, computing, digital communication, document preparation, and the use of digital collaboration tools. I am still a student and do not claim formal work experience, but I am willing to learn and accept feedback as I develop my technical skills.

Thank you for considering my application. I would appreciate the opportunity to be considered for the position.

Respectfully,

Rafael Villanueva

JOB / EMPLOYER REFERENCE

Chosen Opportunity: IT Staff (Open for Fresh Graduates)

Employer: Systemantech

Location: Clark Freeport Zone, Pampanga

Source: Indeed Philippines job listing

Reference: <https://ph.indeed.com/q-it-support-fresh-graduate-l-central-luzon-jobs.html>

BASIS USED FOR THE APPLICATION

The listing identifies an IT Staff position open to fresh graduates. It describes duties including technical support for desktops, laptops, printers, monitors, and other hardware peripherals; software installation and troubleshooting; diagnosing hardware and software problems; assisting users; and maintaining records of support requests.

INFORMATION LITERACY CHECK — CABC

Credibility: The opportunity is published on Indeed Philippines and identifies the employer, position, location, duties, and qualifications.

Accuracy: Important details were checked against the job listing, including the position title, employer, location, responsibilities, and education requirement.

Bias: A job advertisement is intended to attract applicants, so promotional wording may be present. The application uses concrete duties and qualifications.

Currency: The listing was available when this portfolio was prepared. Job postings can change or close, so the source should be rechecked before a real application.

PROCESS & INTEGRITY NOTE

I researched a realistic IT job opportunity using an Indeed Philippines listing and selected the IT Staff (Open for Fresh Graduates) opportunity from Systemantech as the basis for this school project. I reviewed the position title, employer, location, responsibilities, and qualifications before using the information in my resume and cover letter. I also considered the source using the Module 5 CABC checks: credibility, accuracy, bias, and currency.

I used AI as a support tool while preparing this portfolio. It helped with brainstorming, organizing information, improving wording, and reviewing the structure of the documents. I personally reviewed, revised, and verified the final content. I did not use AI to invent work experience, certifications, achievements, or other qualifications.

I protected my privacy by not including passwords, government IDs, bank details, student records, or other unnecessary sensitive information. I used only contact information appropriate for a professional application.

One design decision I made was to keep the resume and cover letter simple, organized, and readable, with consistent headings and spacing. This portfolio is a school project simulating a professional application; I am not claiming that I currently work for the selected employer.
